

GA SIM PLATFORM PRODUCT DETAIL

The GA Platform is your own personal grass-like hitting surface to use with your GolfAchiever, designed for the true feel and play of grass, allowing you to practice your swing with no hand shock or arm injury. Feel how your clubs will perform on the fairway with realistic ball trajectory, spin and yardage. The new design also allows for a smooth transition from right handed to left handed in minutes, and accommodates two GolfAchievers for simultaneous lefty-righty golf simulation play. To enhance GA SIM play, an interchangeable green friction tee holder allows you to insert GolfAchiever top down tees, adjusting tee height preferences for use with your driver.

GA SIM PLATFORM

Benefits

- New sturdy platform design eliminates mat movement from swing torque
- New metal base cover provides extra protection
- Putting mat and base cover allows for a true putting experience
- Platform design provides a left and right hand solution
- Quick and easy platform setup
