G.A. VASP
VIDEO ANALYSIS
SOFTWARE

TECHNOLOGY

G.A. VASP is a high-end Digital Video (DV) golf analysis software program that integrates seamlessly with both the GolfAchiever II and GolfAchiever CAM, combining the statistics of launch monitor technology with the images of Digital Video Analysis. This combination not only allows professionals and students to "see" the swing, which is where traditional video analysis programs end, but also evaluate the swing based on statistics. Along with standard playback controls and drawing features as found in G.A. VAS, G.A. VASP also offers the following features: the ability to create internet lessons, student CDs, student database files, simultaneous capture of up to 6 DV Camera Angles of the same swing, compare up to 8 swings on the same screen, club tracking, image strobe, and more advanced drawing tools. The features and functionality of G.A. VASP make it the finest and easiest to use DV golf analysis program available, while the combination of VASP technology with GolfAchiever Launch Monitor technology makes GolfAchiever the most usable and complete teaching and clubfitting system available.

FEATURES & BENEFITS

- > Launch Monitor Data and Video on Same Screen (VAS & CAM / G.A.II)
- > Video Saved with Launch Monitor Data
- > Quantify Student Progress
- > Simple, Friendly Software
- > Quick Toggle to G.A. Launch Monitor Software
- > Side by Side Compare
- > Interactive Drawing Tools
- > Intuitive Playback Controls
- > Auto Capture and Replay
- > Standard DV Camera Compatible
- > 8 Key Frames
- > Print Outs with Launch Monitor Data
 - Key Frame Booklet
 - Side by Side Compare
 - Individual Frame
- > Corporate Events and Entertainment
- > Hands Free Teaching and Data
- > Data Enforces Club Purchase Decisions
- > Total Teaching-Clubfitting Solution From Single Source (VAS & CAM / G.A.II)
